Seeds for the Future

2019
Tuesday
October 8

NSW Teachers Federation Conference Centre, Reservoir St Surry Hills

Expanding into the suburbs to back up restoration in small remnants and reconstructed linkages: can restoration practitioners collaborate with urban designers and where will the seed come from?

With development pressures, climate change, and declining space for connectivity across the Greater Sydney basin and beyond, there is an increasing need for restorationists, plant producers, planners and landscape architects to collaborate on ensuring natives of the correct provenance and genetics are conserved as well as planted within urban spaces.

Who will be there

Seeds for the Future brings together people from the bush regeneration, revegetation, nursery and landscape architecture sectors to set the scene for future collaborations. It introduces the insightful 'Healthy Seeds' project, offer practical solutions for all players.

Overview and significance

The forum will include in-depth discussion topics, and a showcase of practical case studies to provide background, identify issues and suggest solutions. Discussion time at the end of each session will inform an expert plenary panel drawing together the delegates concerns, and creating a roadmap to guide future strategies and investment across the Greater Sydney area.

If you can't make it you can still experience it

Money raised from ticket sales and donations to RegenTV will enable the forum to be recorded and shared with those unable to attend on the day.
