

Plant Germplasm Conservation in Australia:

Strategies and guidelines for developing, managing and utilising ex situ collections (Third edition)

Martyn Yenson AJ, Offord CA, Meagher PF, Auld TD, Bush D, Coates DJ, Commander LE, Guja LK, Norton SL, Makinson RO, Stanley R, Walsh N, Wrigley D, Broadhurst L (Eds.) (2021)

This fully revised third edition contains new chapters on genetics, identifying non-orthodox species, the role of the nursery, and *ex situ* conservation of orchids, carnivorous and parasitic plants, spores and pollen.

It also includes fifty case studies on all aspects of germplasm conservation, from planning and partnerships to utilisation of collections.

CHAPTER LIST

- 1 Introduction
- 2 Options, major considerations and preparation for plant germplasm conservation
- 3 Genetic guidelines for acquiring and maintaining collections for *ex situ* conservation
- 4 Seed and vegetative material collection
- 5 Seed banking: orthodox seeds
- 6 Identifying and conserving non-orthodox seeds
- 7 Seed germination and dormancy
- 8 The role of the plant nursery in *ex situ* conservation
- 9 Tissue Culture
- 10 Cryopreservation
- 11 Living Plant Collections
- 12 Isolation, propagation and storage of orchid mycorrhiza and legume rhizobia
- 13 Special collections and under-represented taxa in Australasian *ex situ* conservation programs
- 14 Risk management and preparing for crises
- 15 Maintenance, utilisation and information storage
