

LANDCARE LED BUSHFIRE RECOVERY GRANTS PROGRAM

54 PROJECTS ACROSS NSW

Landcare NSW is proud to support over 50 bushfire recovery projects across NSW that are a part of the Australia wide Landcare Led Bushfire Recovery Project.

This Project focuses on species and habitat restoration in those areas severely affected by the bushfires and the essential unburnt habitats, which are vital to protect. These projects bring together a diverse range of experience and expertise from on-ground Landcarers and community groups, Traditional Owners, researchers, subject matter experts, Not-For-Profit organisations and more.

684 ARTIFICIAL HABITATS / NESTBOXES INSTALLED

1,197 HA OF WEED CONTROL UNDERTAKEN

WHY LANDCARE?

Landcare communities have a critical connecting role in delivering aid from government agencies during and after disasters. In addition, Landcare has always provided a long term view on sustainable recovery and rehabilitation of impacted land.

It has been demonstrated throughout the program that Landcare coordinators and facilitators provide a vital connecting role in impacted communities. In many communities, they are the go-to representative for recovery and disaster preparedness and resilience.
